CSI-D-5 Kit Features

The ConditionSensor Interface CSI-D-5 is a package. You can use the CSI-D-5 to connect a fluid sensor (e.g. CS 1000 and MCS 1000) to your PC to:

- Operate (set parameters and limit values) or
- Read out measured values online and save them in a .sav file. .sav files cannot be opened directly with MS Excel.

Checking scope of delivery of the CSI-D-5 kit

CSI-D-5 Connection Overview

Connect the CSI-D-5 according to the following connection diagram:

CSI-D-5 <-> CS1000

CSI-D-5 <-> MCS1000
Installing USB Driver Software

Connect the CSI-D-5 before you install the software.

To install the software driver, proceed as follows:
Connect the CSI-D-5 to the CS 1000 according to the diagram.
Connect the adaptor box to the PC via the USB cable. The PC recognizes the hardware/device automatically.

If no suitable driver has yet been installed, insert the CD-ROM with FluMoS with the corresponding driver into the CD drive.
The USB port will note the installation of FluMoS. Always use the same USB port for connecting the CSI-D-5.

Insert the CD-ROM with FluMoS. Then click on OK.
Select the letter of your CD-ROM drive.

Click on OK.
The driver ser2pl.sys will now be installed.
If installation is successful, you will find the driver with the corresponding COM port no. in your device manager of the system control. Identify the COM-Port for the FluMoS software.
